

STATEMENT of QUALITY POLICY

The Directors of Quattro Plant Limited understand the importance and embrace the benefits that our Quality Management System brings to the company. A framework for reviewing the system, our objectives and targets and the underpinning procedures has been established to realise continuous improvement in our business.

The principle objective is to make us the natural first choice for potential as well as existing customers. In order to achieve this we are committed to providing a quality of plant and service which meets not only the specified requirements of our customers but also their implied expectations and gives them no cause for complaint.

Our commitment to each of our customers is to provide a truly outstanding level of product and service and we are confident that this can assist in maximising their productivity and efficiency, thereby adding value to their business.

In order to ensure that we continue to meet these goals we have implemented and maintain a documented Quality Management System, of which this Statement is the cornerstone and meets the requirements of BS.EN.ISO 9001:2008. We are committed to comply with the requirements of our Quality Management System which includes measures that have been devised to ensure a continual improvement to both the quality of the service which we provide to our customers, and the Quality Management System itself. In order to ensure the continued effectiveness of our Quality Management System it is reviewed at defined intervals and in accordance with a documented Procedure.

We have appointed a dedicated Assurance and Compliance Manager who is responsible for maintaining and developing our Quality System and for ensuring that it remains relevant not only to the our operation and objectives but also to the needs and expectations of our customers.

A handwritten signature in blue ink that reads "John Murphy". The signature is written in a cursive style with a large, stylized "J" and "M".

**John Murphy,
Managing Director.**
